PROJECT EXPERIENCE

Plant Disease Detection(Stacks used: Python, ML)

As a passionate machine learning enthusiast, I undertook a significant project aimed at addressing real-world agricultural challenges through the application of advanced technology. This project involved the development of a robust system for the detection and diagnosis of plant diseases using machine learning algorithms.

Car Price Prediction(Stacks used: Python, ML)

Developed machine learning model for car price prediction, utilizing Python and popular libraries such as Scikit-learn and TensorFlow. Leveraged data preprocessing techniques and various regression algorithms to achieve accurate predictions.

Stocks Price Prediction(Stacks used: Python, ML)

Developed machine learning models for stock price prediction, leveraging predictive analytics and data-driven insights.

ATM management system(Stacks used: Java, MySQL)

In the ATM program, the user has to select an option from the options displayed on the screen. The options are related to withdraw the money, deposit the money, check the balance, and exit.
